Forecast for Wednesday 29 Sep 2021

Weather: Scattered showers, increasingly wintry above Munro level, mainly in the west, become fewer and lighter through the day, with some good spells of sunshine around. Cloud increases from the west through this evening.

Chance of cloud free mountain/hill tops above 800m: Around 60% in far west, otherwise close to 75%

Visibility: Occasional or periods of cloud above 600-750m expected in the far west, cloud more occasional above 750m in east. Otherwise visibility very good or excellent with, mainly in the west, only brief reductions due to showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Valley temperatures in east near plus 4 or 5 Celsius at dawn. Sub-zero feels like temperatures above Munro level.

Forecast for Thursday 30 Sep 2021
Weather: Cloud and occasionally heavy rain, preceded briefly by sleet or wet snow on highest summits, spreading east overnight. The occasionally heavy rain clears east soon after dawn with sunny spells and showers following, the showers may merging to give some longer spells of rain in west through the afternoon and evening.

Maximum wind: Southerly winds increase to 25-35mph, with gusts around 55mph over ridges and summits in west through the early hours gradually ease, and turn more southwesterly, 15-20mph from mid-morning.

Chance of cloud free mountain/hill tops above 800m: Little chance at first, and later in west, otherwise around 60%

Visibility: Periods or persistent cloud above about 450-600m, with patches below, at first and later in the west, otherwise cloud more occasional above about 600-750m. Generally visibility, very good falling to several kilometres in rain and showers.

Temperature: **Glens:** Around plus 8 Celsius soon after midnight rising to plus 13 Celsius by day
At 800m: Plus 5 Celsius, with significant wind-chill effect especially at first
Freezing level: Around 1200m soon rising above summits.
